

Cancel & Refund Scripts

Copy-and-paste messages to cancel a subscription, ask for a refund after a surprise charge, or lower a price. Fill in the [brackets], send, and keep a copy.

Before you write: 4 quick steps

1. **Gather the details.** Account email, the date and amount of the charge, and the plan name.
2. **Look for the cancel option first.** It's usually under Account, Billing or Subscription settings. Cancelling there is the fastest route.
3. **Take a screenshot** of the cancellation confirmation or the charge. Keep it with your records.
4. **Write it down.** Email or chat lets you keep a record, which a phone call doesn't.

Tone tip: Be polite, brief and specific. Support teams approve more requests when you name the charge and say exactly what you want.

3. Accidental renewal

Use when an annual or monthly plan renewed and you forgot.

Use when you want to keep it but the price went up, or you're thinking of leaving.

5. Phone or live-chat script

Use when you can only reach someone by phone or chat.

SAY

If they offer a discount you'd actually like: "Thanks, I'll take that instead. Can you confirm the new price by email?"

6. If they say no or don't reply

FOLLOW-UP AFTER 3-5 DAYS

- Check the company's refund and cancellation policy page. Quote the exact line if it helps your case.
- If you still can't get a response, your payment provider or card issuer may offer a dispute process. Check their rules and time limits first, and contact the company before you dispute.

Keep this record for each subscription

- Date you cancelled or asked for a refund
- Name of the support person or chat reference number
- Screenshot of the confirmation
- The refund amount and the date it should arrive
